

Exploring ODEs

Lloyd N. Trefethen, Ásgeir Birkisson, and Tobin A. Driscoll

1. Introduction, 1
2. First-order scalar linear ODEs, 9
3. First-order scalar nonlinear ODEs, 21
4. Second-order equations and damped oscillations, 34
5. Boundary-value problems, 46
6. Eigenvalues of linear BVPs, 58
7. Variable coefficients and adjoints, 71
8. Resonance, 85
9. Second-order equations in the phase plane, 96
10. Systems of equations, 107
11. The fundamental existence theorem, 121
12. Random functions and random ODEs, 132
13. Chaos, 145
14. Linear systems and linearization, 160
15. Stable and unstable fixed points, 172
16. Multiple solutions of nonlinear BVPs, 182
17. Bifurcation, 196
18. Continuation and path-following, 211
19. Periodic ODEs, 222
20. Boundary and interior layers, 237
21. Into the complex plane, 249
22. Time-dependent PDEs, 261
