

Tobin A. Driscoll

Department of Mathematical Sciences
University of Delaware
Newark, DE 19716 USA
Voice: +1-302-831-3383
mailto:driscoll@udel.edu; www.tobydriscoll.net

Research interests

Numerical analysis & scientific computing
Applications of mathematics and computing to the life sciences and medicine

Education

Ph.D. in Applied Mathematics, Cornell University, 1996
Dissertation: *Domain decomposition methods for conformal mapping and eigenvalue problems*
Advisor: Lloyd N. Trefethen

M.S. in Applied Mathematics, Cornell University, 1993

B.S. in Mathematics with honors, Pennsylvania State University, 1991
Honors thesis title: *Comparison of computational efficiency and sensitivity of several solution algorithms for the linear-quadratic optimal control problem*
Advisor: John E. Dzielski

B.S. in Physics, Pennsylvania State University, 1991

Professional experience

University of Delaware
Professor, Department of Mathematical Sciences (2010–present)
Affiliated Faculty, Department of Biomedical Engineering (2014–present)
Associate Professor, Department of Mathematical Sciences (2004–2010)
Assistant Professor, Department of Mathematical Sciences (2000–2004)

University of Colorado at Boulder
Postdoctoral research fellow, Department of Applied Mathematics (1996–2000)

Honors

Outstanding Scholar Award, College of Arts & Sciences, University of Delaware, 2014 (sole winner for year)

Winner, 100 Digit Challenge (SIAM), 2002

NSF VIGRE Postdoctoral Fellow, 1999–2000

NSF Mathematical Sciences Postdoctoral Research Fellow, 1996–1999

SIAM Outstanding Paper Prize, 1999

Runner-up, Richard C. DiPrima Dissertation Prize, 1998

Second Prize, Leslie Fox Competition, 1997
SIAM Student Paper Prize Honorable Mention, 1995
NSF Graduate Fellow, 1991–94
A. D. White Fellow (Cornell graduate), 1991–94
Braddock Scholar (Penn State undergraduate), 1987–91

Grants

- R. J. Braun (PI), T. A. Driscoll, and K. L. Maki (co-PIs). Collaborative Research: Tear Film Dynamics: Modeling, Blinking, and Computation. NSF DMS-1412085, \$375,003, 2014–2017.
- M. McCulloch (PI), T. A. Driscoll, and G. Schleiniger (co-PIs). Data driven mathematical modeling of the hypoplastic left heart syndrome circulation. NIH Delaware INBRE III, \$60,724, 2014–2016.
- T. A. Driscoll. Chebfun support from The MathWorks, Inc., 2013–2015.
- M. McCulloch (PI), T. A. Driscoll, and G. Schleiniger (co-PIs). Computer simulation of the single ventricle anatomy and physiology explaining mechanisms for sudden cardiac death. NIH Delaware INBRE Grant, \$44,182, 2013–2014.
- T. A. Driscoll (PI) with 5 other key personnel. Meeting the need in mathematics at the University of Delaware. U.S. Department of Education Graduate Assistance in Areas of National Need, \$527,700, 2012–2015.
- R. J. Braun (PI) and T. A. Driscoll (co-PI), Modeling tear film dynamics. NSF DMS-1022706, \$444,000, 2010–2013.
- L. F. Rossi, T. Driscoll, and R. Luke (co-PIs), Strengthening mathematics instruction with automated algorithmic mastery activities. Center for Teaching Effectiveness (UD), \$20,000, 2007.
- R. Braun (PI), L. P. Cook, and T. A. Driscoll (co-PIs), Modeling the blink cycle and lipid dynamics in the tear film. NSF DMS-0616483, \$325,000, 2006–2009.
- H. B. White *et al.* (co-PIs), with T. A. Driscoll and others as senior personnel. Howard Hughes Medical Institute Undergraduate Science Education grant, 2006–2010, \$1,500,000.
- R. Braun, T. A. Driscoll, P. Monk, L. F. Rossi (co-PIs). NSF Scientific Computing Research Environments for the Mathematical Sciences. NSF DMS-0322583, \$68,460, 2003.
- University of Delaware International Travel Award, 2003.
- T. A. Driscoll (PI). Novel fast and accurate methods for partial differential equations. NSF DMS-0104229, \$88,407, 2001–2004.
- T. A. Driscoll (PI). Fast time stepping for the computational simulation of differential equations. University of Delaware Research Foundation, \$21,042, 2001–2002.
- T. A. Driscoll (PI). NSF Mathematical Sciences Postdoctoral Research Fellowship (University of Colorado). NSF DMS-9627677, \$75,000, 1996–1999.

Books

- L. N. Trefethen, A. Birkisson, and T. A. Driscoll. *Exploring ODEs*, SIAM, to appear in 2018.
- T. A. Driscoll and R. J. Braun. *Fundamentals of Numerical Computation*, SIAM, to appear in 2017.
- T. A. Driscoll, N. Hale, and L. N. Trefethen, eds. *Chebfun Guide*, 1st edition. Oxford, UK, 2014.

Recent invited presentations

Dynamics on a model blinking eye-shaped domain

SIAM Annual Meeting Minisymposium, Boston, July 2016.

Data-driven systemic modeling of infant hypoplastic left heart syndrome

Center for Cardiovascular Health Symposium, University of Delaware, October 2015.

Flipping the classroom for numerical computation

MathWorks Research Summit, Natick, MA, June 2015.

Automatic multivariate approximation

SIAM Computational Science and Engineering Conference Minisymposium, Salt Lake City, AZ, April 2015.

An open-source software project for numerical conformal mapping

BIRS Workshop on Modern Applications of Complex Variables, Banff, AL, January 2015

New directions in spectral methods

Numerical Analysis Seminar, Cornell University, November 2014

Optimal splitting in spectral collocation

Seminar, Oxford University, November 2013

Numerical computing with functions

Colloquium, Wichita State University, September 2013

Reflections on flipping a math classroom

Summer Faculty Institute, University of Delaware, June 2013

Optimal splitting in spectral collocation

Seminar, Arizona State, April 2013

Numerical computing with functions

Colloquium, Arizona State, April 2013

Numerical computing with functions

Colloquium, Temple University, December 2012

Chebfun beyond the ordinary (DE)

[Chebfun and Beyond](#), Oxford University, September 2012

Spectral deferred correction for time-dependent PDEs in Chebfun

[SIAM Annual Meeting 2012](#), Minneapolis, July 2012

Chebfun for PDE

[Eigenvalues/singular values and fast PDE algorithms: acceleration, conditioning, and stability](#), Banff International Research Station, June 2012

Optimal splitting in spectral collocation

Del-Mar Numerical Analysis Day, University of Delaware, April 2012

Differential equations in Chebfun

[Seventh International Congress on Industrial and Applied Mathematics](#), Vancouver, July 2011
(minisymposium)

Rectangular projections for reliable spectral collocation

[Seventh International Congress on Industrial and Applied Mathematics](#), Vancouver, July 2011
(minisymposium)

Chebfun: A software system for interacting with functions

NSF-CBMS Conference on Radial Basis Functions, Dartmouth, MA, June 2011

Approximation Theory, Spectral Methods, and Chebfun (with L. N. Trefethen)

[Fifth annual Dobbiaco Summer School](#), Dobbiaco, Italy, June 12-17, 2011

Automatic Fréchet differentiation for the spectral solution of boundary-value problems

SIAM Annual Meeting, July 2010 (minisymposium)

Automatic solution of differential equations in the chebfun system

Canadian Applied and Industrial Mathematics Society, University of Western Ontario, June 2009

SIAM Southeastern-Atlantic Section Conference, University of South Carolina, April 2009

Courant Institute seminar, February 2009

Teaching experience

Undergraduate experience

Calculus A,B,C

Includes special section of Calculus A for life sciences majors

Linear algebra (math and engineering majors)

ODEs (math and engineering majors)

PDEs

Numerical analysis (two-semester sequence)

Complex analysis

Graduate experience

Numerical linear algebra and equation solving

Numerical ODEs/PDEs

Spectral/high-order methods for PDEs

Radial basis functions

Philosophy

While I enjoy lecturing, I no longer believe it should be the only or even primary way of teaching most math classes. The marginal benefits of a live lecture over a recorded one are overshadowed by supervised active learning, which leads to increased sharing of the instructor's expertise directly with students as they wrestle with the material in new problems and situations. I am still experimenting with techniques such as problem-based learning, laboratory exploration, and flipping the classroom for my own teaching. In addition, I believe mathematics needs to embrace teaching computation throughout the curriculum, rather than quarantining it into a few courses or lab sections.

Use of technology

Video recorded lectures with quizzes for numerical analysis and vector calculus

Maple demos, labs, and projects in computer classrooms for calculus, ODEs

MATLAB demos, labs, and projects in computer classrooms for linear algebra, numerical analysis
In-class demos for complex analysis
Student blogs and wikis
Maple TA, Webassign for computer assigned/graded homework in calculus
Lightscribe pencasts (ODEs/linear algebra)
Screen capture on a tablet PC (calculus, numerical analysis)
Use of Sakai and Canvas LMS

Professional activities

Associate Editor of the *SIAM Journal on Scientific Computing*, 2008–2014
Associate Editor of *Journal of Engineering Mathematics*, 2010–2015
Member, Society for Industrial and Applied Mathematics
Referee for SISC, SINUM, J. Comput. Phys., Proc. Royal Soc. A, J. Comput. Appl. Math., Computers Math. Appl., J. Sci. Comput., Num. Meth. Fluids, J. Phys. A, Phys. Rev. E, SIAM J. on Applied Dynamical Systems, Constr. Approx., Complex Var., Comput. Meth. Func. Theory
Book reviewer for SIAM Review, Wiley, J. Flu. Mech.
Reviewer of grant proposals for NSF and the Swiss National Science Foundation
Organizing committee of Mathematical Problems in Industry, 2004 (Delaware)

Students supervised

Lei Chen (Ph.D. candidate)
Shawn Abernethy (M.S. with thesis, 2013)
Quan Deng (Ph.D., 2013)
Alfa Heryudono (Ph.D., 2008)
Rodrigo Platte (Ph.D., 2005)

Academic visits

Institute for Mathematics and Its Applications, University of Minnesota, September–December 2010
Oxford University Computing Laboratory, January–June 2008
Oxford University Computing Laboratory, June 1999
ETH-Zürich (Swiss Federal Institute of Technology) Supercomputing Institute, Summer 1994

Consultations

United Technologies, 2002–2003
Contact: Fabio Bertolotti. Use of spectral methods in investigating thermoacoustic instability (“singing flame”) in power-generating turbines.

Weidlinger Associates, 1998–2000

Contact: Greg Wojcik. High-order and spectral methods in space and time for the numerical simulation of acoustic wave propagation in tissue.

IBM Almaden Research Center, 1995–2001

Contact: Martin Hassner. Applications of conformal mapping to inductive and magnetoresistive read heads for hard drives.
