Tobin A. Driscoll

tobydriscoll.net

Research interests

Numerical analysis & scientific computing
Applications of mathematics and computing to the life sciences and medicine
Mathematical software in MATLAB and Julia

Education

Cornell University   1996

Ph.D. in Applied Mathematics
Dissertation: Domain decomposition methods for conformal mapping and eigenvalue problems
Advisor: Lloyd N. Trefethen

Cornell University   1993

M.S. in Applied Mathematics

Pennsylvania State University   1991

B.S. in Mathematics with honors

  Honors thesis title: Comparison of computational efficiency and sensitivity of several solution
     algorithms for the linear–quadratic optimal control problem
  Advisor: John E. Dzielski

B.S. in Physics

Professional experience

University of Delaware   2000-present

Director, Master of science in data science (since 2023)
Unidel Chaired Professor of Mathematical Sciences (since 2022)
Professor, Department of Mathematical Sciences (since 2010)
Affiliated Faculty, Department of Biomedical Engineering (since 2010)
(2004-2010) Associate Professor, Department of Mathematical Sciences
(2000-2004) Assistant Professor, Department of Mathematical Sciences

University of Colorado at Boulder   1996–2000

Postdoctoral research fellow, Department of Applied Mathematics

Honors and awards

Outstanding Scholar Award, College of Arts & Sciences, University of Delaware (sole winner for year)	2014
Winner, 100 Digit Challenge (SIAM)	2002
NSF VIGRE Postdoctoral Fellow	1999–2000
NSF Mathematical Sciences Postdoctoral Research Fellow	1996–1999
SIAM Outstanding Paper Prize	1999
Runner-up, Richard C. DiPrima Dissertation Prize	1998
Second Prize, Leslie Fox Competition	1997
SIAM Student Paper Prize Honorable Mention	1995
NSF Graduate Fellow	1991–1994
A. D. White Fellow (Cornell graduate study)	1991–1994
Braddock Scholar (Penn State undergraduate study)	1987–1991

Grants	R. J. Braun (PI), T. A. Driscoll (co-PI). Models for Tear Film Structure, Dynamics and Parameter Identification. NSF DMS-1909846, $375,000.	2019–2022
	R. J. Braun (PI), T. A. Driscoll, and K. L. Maki (co-PIs). Collaborative Research: Tear Film Dynamics: Modeling, Blinking, and Computation. NSF DMS-1412085, $375,003.	2014–2017
	M. McCulloch (PI), T. A. Driscoll, and G. Schleiniger (co-PIs). Data driven mathematical modeling of the hypoplastic left heart syndrome circulation. NIH Delaware INBRE III, $60,724.	2014–2016
	T. A. Driscoll. Special support from The MathWorks, Inc.	2013–2015
	M. McCulloch (PI), T. A. Driscoll, and G. Schleiniger (co-PIs). Computer simulation of the single ventricle anatomy and physiology explaining mechanisms for sudden cardiac death. NIH Delaware INBRE Grant, $44,182.	2013–2014
	T. A. Driscoll (PI) with 5 other key personnel. Meeting the need in mathematics at the University of Delaware. U.S. Department of Education Graduate Assistance in Areas of National Need, $527,700.	2012–2015
	R. J. Braun (PI) and T. A. Driscoll (co-PI), Modeling tear film dynamics. NSF DMS-1022706, $444,000.	2010–2013
	L. F. Rossi, T. Driscoll, and R. Luke (co-PIs), Strengthening mathematics instruction with automated algorithmic mastery activities. Center for Teaching Effectiveness (UD), $20,000.	2007
	R. Braun (PI), L. P. Cook, and T. A. Driscoll (co-PIs), Modeling the blink cycle and lipid dynamics in the tear film. NSF DMS-0616483, $325,000.	2006–2009
	H. B. White et al. (co-PIs), with T. A. Driscoll and others as senior personnel. Howard Hughes Medical Institute Undergraduate Science Education grant, $1,500,000.	2006–2010
	R. Braun, T. A. Driscoll, P. Monk, L. F. Rossi (co-PIs). NSF Scientific Computing Research Environments for the Mathematical Sciences. NSF DMS-0322583, $68,460.	2003
	University of Delaware International Travel Award	2003
	T. A. Driscoll (PI). Novel fast and accurate methods for partial differential equations. NSF DMS-0104229, $88,407.	2001–2004

<div style="text-align:right">1993</div>

"Schwarz–Christoffel mapping in MATLAB," Cornell Numerical Analysis Day, 1993.

Students supervised   Kevin Aiton, Ph.D., 2019

Shawn Abernethy, M.S. with thesis, 2013
Quan Deng, Ph.D., 2013
Alfa Heryudono, Ph.D., 2008
Rodrigo Platte, Ph.D., 2005

Teaching

Philosophy

While I enjoy lecturing, I no longer believe it should be the only or even primary way of teaching most math classes. The marginal benefits of a live lecture over a recorded one are overshadowed by supervised active learning, where the instructor shares expertise with students as they wrestle with the material themselves. I use techniques such as problem-based learning, laboratory exploration, personal response systems, and flipping the classroom to create active learning opportunities. In addition, I believe mathematics needs to embrace teaching computation throughout the curriculum, rather than quarantining it into a few courses or lab sections.

Undergraduate

Calculus A,B,C
Including special section of Calculus A for life sciences majors

Linear algebra (math and engineering majors)
ODEs (math and engineering majors)
PDEs (math and engineering majors)
Computational mathematics (two-semester sequence)
Complex analysis

Graduate

Numerical linear algebra and nonlinear equations
Numerical ODEs/PDEs
Spectral/high-order methods for PDEs
Radial basis functions

Service activities

Department of Mathematical Sciences

Director of Graduate Studies (Delaware), 2011–2014
Director of Undergraduate Studies (Delaware), 2018–2021
Member of ad hoc committee to create the B.S. degree in Quantitative Biology
Initial proposer of B.S. degree in Applied Mathematics
Chaired ad hoc committee to create B.S. degree in Data Science
FIrst to teach Math 219, Data Science I

College and university

ADVANCE Fellow and Senior Fellow, 2020–present
Faculty Senate Ad Hoc Subcommittee on Promotion Criteria for Continuing Track Faculty, 2021–2022
University Strategic Planning Working Group on Redefining Creativity, Innovation and Entrepreneurship, 2021
Faculty Senate Promotion and Tenure Committee, 2018–2020 (Chair for 2019–2020)

Faculty Senate Undergraduate Studies Committee, 2008–2010

Arts & Sciences Educational Affairs Committtee, 2004–2005

Profession Communicating Editor of Advances in Computational Mathematics, 2019–present

At-Large Member of the SIAM Council, 2015–2018

Associate Editor of Journal of Engineering Mathematics, 2010–2015

Associate Editor of the SIAM Journal on Scientific Computing, 2008–2014

Organizing committee of Mathematical Problems in Industry, 2004 (Delaware)

Academic visits Institute for Mathematics and Its Applications, University of Minnesota, September–December 2010

Oxford University Computing Laboratory, January–June 2008

Oxford University Computing Laboratory, Summer 1999

ETH Supercomputing Institute, Zürich, Summer 1994

Consultations United Technologies, 2002–2003

Contact: Fabio Bertolotti. Use of spectral methods in investigating thermoacoustic instability in power-generating turbines.

Weidlinger Associates, 1998–2000

Contact: Greg Wojcik. High-order and spectral methods in space and time for the numerical simulation of acoustic wave propagation in tissue.

IBM Almaden Research Center, 1995–2001
